

## RESTRAINT-MATE

# Webbing Tie-Downs

Ratchet Webbing Tie-Downs are now widely used in the transport industry. Webbing tie-downs are light-weight, easy to handle and easy to use. Although not as durable as Grade 70 chain and components webbing tie-downs are kind on the cargo and are well suited to many types of lashing applications. Webbing lashings are more elastic than chains and therefore retain more tension than a chain assembly if the load moves or settles during transport.

Advantages of Ratchet Webbing Tie-Downs include:

- Less Loading Time.
- Quicker turnaround time.
- Less Damage to cargo or paintwork.
- Maximum pay load.
- Adaptability.
- On-board storage.

Nobles RESTRAINT-MATE Ratchet Webbing Tie-Downs are manufactured to AS 4380.

25mm tie downs have J hooks whereas 35, 50 and 75mm feature hook and keeper end fittings for high strength and security to hold onto the tie rail.

# Product Specifications

<b>Name</b>	<b>ITEM #</b>	<b>Strap Width (mm)</b>	<b>Strap Length (m)</b>	<b>Lashing Capacity (kg)</b>	<b>End Fittings</b>	<b>Weight (kg)</b>
